FEMININE FLAIR

MARKETPLACE PLATFORM • PROJECT PITCH

Prepared for Faith Minga

Prepared by Dennis Bundi | Developer

THE OPPORTUNITY

Feminine Flair brings the brand's growing social following onto a single, purpose-built marketplace — one place for customers to browse, buy, and pay for women's clothing and accessories, and one dashboard for the business to manage every sale, online or in person.

From feed to checkout — without leaving the brand.

4

Core Systems

4 Wks

Target Build Time

\$1,200

Project Investment

2

Sales Channels United

THE PLATFORM AT A GLANCE

Four systems, working as one marketplace

Customer Storefront

Browse, search, and buy across the full catalog

Admin Dashboard

Manage products, orders, and customers in one place

Orders & Payments

Checkout and payment collection via Paystack

POS System

Ring up in-person sales, synced to the same inventory

CUSTOMER STOREFRONT

What every shopper sees and uses

Browse & Filter

Catalog organized by category, with filters for size, color, and price

Cart & Checkout

A smooth, multi-step path from product page to confirmed order

Customer Accounts

Registration, login, order history, and saved delivery addresses

Wishlist & Favorites

Customers save pieces to revisit and buy later

ADMIN DASHBOARD

Everything the business needs to run the shop

Product Management

Add, edit, and remove listings; manage size/color variants and stock levels

Order Management

Track fulfillment status from pending through delivered; manage returns

Customer Management

View customer profiles and full order history

Sales Reporting

Revenue visibility across both online and in-person (POS) sales

ORDERS & PAYMENTS

Checkout is handled end-to-end through Paystack, giving customers card and mobile-money options in one secure flow.

Payment provider: Paystack

Replaces the M-Pesa/Daraja integration referenced in the original agreement.

Cards & Mobile Money

Paystack accepts card and mobile-money payments at checkout

Secure Checkout

PCI-compliant processing keeps customer payment data protected

Automated Receipts

Instant payment confirmation and order receipts

Order Status Tracking

Pending → processing → shipped → delivered

BACKEND INFRASTRUCTURE

Powered by Supabase

Structured Data

A clean schema for products, categories, orders, users, and transactions

Authentication & Access

Role-based access separating admin controls from customer accounts

Media Storage

Reliable cloud storage for product photos and other assets

POINT-OF-SALE (POS) SYSTEM

One inventory, two ways to sell

Online Storefront

Customers shop and check out through the marketplace, any time

In-Person POS

Walk-in and event sales are rung up directly on the POS

Real-time inventory sync prevents overselling; daily sales reconcile across both channels

PROJECT TIMELINE

A four-week build, plus a revision week

INVESTMENT & PAYMENT SCHEDULE

Total contract value: \$1,200, split across two milestones

Note: the upfront installment was received as KES 75,000. Any variance against the \$600 USD equivalent should be reconciled against the exchange rate on the payment date.

NEXT STEPS

Confirm scope

Sign off on the Paystack payment update to the original agreement

Kick off Week 1

Begin environment setup and dashboard scaffolding

Weekly check-ins

Short progress updates through each build phase
